Re: Mike LeFevre

Hi Amy,

Mike Lefevre is doing extremely well and will be released from the hospital on Friday, January 20th, barring any setbacks. He is in very good spirits with minimal pain as a result of the tests conducted yesterday. All tests conducted yesterday were negative and at this time, no additional procedures will be required. A Stint will not need to be put in place and immediate treatment will be taken orally. The Blood Clot in his lung has been reduced by 50% and it is expected to be completely dissolved in two to three weeks.

I have passed everyone's thoughts, prayers, and concerns to him over the past two weeks. He is itching to get back to work but I told him to relax, take it easy, get completely well, and then come back to work. The timeline to return to work will be determined Friday when he is released from the hospital.

Regards,

Sherman A. Loney
